

Medical Quiz

Saeed Alhindi, MD, CABS, FRCSI*

A ten year-old boy presented with a sudden onset of left loin colicky pain radiating to left groin. The pain is associated with gross hematuria. Physical examination showed tachycardia and left renal angle tenderness. Urine microscopic test showed many red blood cells. See the radiological examination and answer the following questions.

- Q.1.** Name the radiological investigation and describe the abnormal findings.
Q.2. Mention two management options.
