

Hereditary Progressive Cone Dystrophy

Wael Wagih, FRCSed, PhD, MCs* Seemantini Ayachit, MBBS, DOMS, PGDM-HM**
Abdulla Almoosa, MD*** Mohammed Latheef, MSc Optometry****

Cone dystrophy is a rare hereditary eye disease involving retinal cone photoreceptors, which affects the central vision and color vision. Most patients present with defective color vision and significant photophobia.

We present two rare cases of progressive cone dystrophy who presented to the Ophthalmology Clinic and were treated conservatively.
